

DOCS - MONEY!

MAKE \$1,000'S IN CASINO PROFITS!

Copyright Wass Trading 2006.

This e-book comes with full resale rights RRP \$97.

Nobody but the writers of this ebook have the right to change any information in it.

Congratulations: You have just downloaded the Doc's amazing roulette system.

You now have access to the most successful and unorthodox system on the net! You can begin using these strategies for immediate results – turning casinos into your very own cash cow.

Now, let's get one thing straight. Some people may call me crazy, and yes I have spent most of my later life studying the arts of gambling – but then again, who in the world has a system as powerful as mine? A system that has caused me to get banned from the world's largest online casino, a system that has allowed well over 2,000 people to cause the worlds largest casino to have massive losses!

So you don't believe me? Well I have the emails from the casino to prove it!

Now there's something you may notice about my guide, and that is that it's not very big. Well, that's because I miss out all of the filler and get straight down to what works! If you want to buy a 100 page book containing the origins and history of roulette then that's what the other guys out there sell - for up to \$97! So if you would like to buy their guides then I welcome you to go and purchase them and then fall asleep reading 100's of pages of useless junk. I only show you what you need to know and that's how you could make a serious amount of money online - starting from today!

You will be amazed at the amount of money you could make from this system as many of my customers are doing.

But first of all, you might want to know why I have spent so many years of my life carrying out experiments on the roulette table. It all started when I went to the casino for the first time. I lost. And wasn't best pleased about it, let me tell you! It annoyed me that something that appeared so simple in theory, proved so difficult to predict, and from that point on it became my mission to try and beat it! I liked the idea that buried somewhere in the roulette wheel there would be a simple mathematical principle that would tilt the odds in my favour. And let me tell you it was a long and winding road! But there was always light at the end of the tunnel, and in the end I got there. I hit upon a method that was simple to use and 'pon my soul did it turn a profit!

This method was so simple I could not understand why it had taken me so many years to discover? Then again, to the ordinary person this flaw would be nearly impossible to find as it is so easily overlooked.

Now on the following pages I'm going to tell you how you can join in on this amazing discovery. But I do ask that you read all instructions carefully and that you practice the system so that you understand it properly before trying to use it!

And please don't worry; if you follow the instructions properly you will make money!

Now please remember, you MUST follow my instructions to the letter that is the whole point of my system – any deviation, no matter how small or trivial can spell disaster! Do not even attempt to do anything with my system unless you can click where I tell you and bet where I tell you to – that is how my system works. Please ensure that you read ALL THE WAY THROUGH this text BEFORE attempting ANY betting. It will not take long as is very important!

As you probably know the odds on a Roulette table are based on the "law of averages" minus one or two points. This way, the Casino can only gain money from you playing the table. Until my little discovery of course! I have gone and blown away the stupid "Law of Averages" and turned it to the players' advantage. I know you want to ask me will the Casino cotton on? Yes the casino will cotton on, just as the last one did when they started to see a massive loss from all of the players I have introduced to my system. And guess what? My system no longer works there as well as it did! I wonder why? Just a coincidence? I think not! That's why you must play on the casino I recommend because every time a new casino cottons on to my system I move myself and all of my players somewhere else, and I will update you each time this happens. So how long will it take for the casino to cotton on? How long is a piece of string? If you think about it, how many people are out there playing on online Casinos? You wouldn't believe me if I told you! We are

talking millions of people. Compare that to the number of people using the following system and it'll be something like one in 3 million! Every Casino has an "Acceptable Loss" therefore that gives us all plenty of time to win some serious money before they change the gaming rules!

Now what you have been waiting for... My System:

Firstly, you must download the new tried and tested casino, as that is where my system works best. Therefore I seriously recommend this is where you use my system and if you don't use it here I don't know why I'm even wasted my time passing on such precious information. (Using this exact link also has other benefits....See page 13).

[Click Here – To Download The Free Casino Software.](#)

Now I know most of you will know how to download the casino software for themselves as it is pretty straightforward but not everyone is a computer whiz so for those of you that are new to computers below are full instructions on how to download the casino software. If you know how to do this for yourself then you can just skip this section to page ? But I do suggest you just read along anyway just to make sure you've done everything correctly.

Getting Started.

Step1.

[Click on this link to go to the casino.](#) Like I say I have tried many online casinos but this is where my system has the largest hit rate percentage.

Step 2.

Then click ok to download the casino software.

The following box will pop up and ask "Do you want to run or save this file?" – You will need to click on the 'Run' button.

The casino will then start downloading. A status bar will indicate its progress.

Depending on your computer's settings you may see the following box? There is no need to worry just click on 'Run' again and the casino will download –

You don't have to worry about viruses with this casino as they are one of the largest online casino's in the world – millions of people download there software every year. That has its advantages too – but I'll explain that later!

You will then see the following screen – This is the casino software downloading onto your computer. You must **click on “Install”** for this progress to begin.

Once the download has completed you will be asked to review the terms and conditions. **Click on “I Agree” to continue.**

Once downloaded, we get into the business of making money! I suggest that you go to the practice play version first so that you can fully understand the power of my system, and see how much money you are going to make from it. Once you are comfortable using the system, you will need to transfer money into your Casino account. **THIS IS IMPORTANT**; This Casino offers you a 320% bonus on your first deposit – **MAKE THE MOST OF IT!** If you deposit \$100 (£53!) to your account, you will receive \$320 in bonus money! That means that for a deposit of \$100 you will get \$420 (£220!) into your account! This bonus is exclusive to my link – normal players do not get offered this size bonus – I told you that you were getting something special! You are \$320 (£168) in profit already! You can also deposit in pounds sterling and get the same great bonus! (You will need to deposit £100 to get £420 into your account) - [Click Here!](#)

[NOW IT'S TIME TO WIN SOME MONEY!](#)

[Download the Free Casino Software – Click Here!](#)

Now, I will state again make sure you read all of the instructions carefully and you understand everything fully before you start using my system. Then and only then will you be able to make thousands from my system. My system is based on betting on the column dozen bets Low/Middle/High fields ONLY as this is where the flaw occurs. You simply bet on the same one,

with only a slight rise in stake each time, until it wins. I know that some of you will be thinking “oh no, that sounds dangerous...” but please, read on...

These fields have a 1 in 3 chance of winning according to the “Law of Averages” and give a return of 2 to 1. By following my system, you only need 1 in 14 to be a winner! (Depending on your balance) This way, you have more than quadrupled the “Law of Averages” and given yourself an unbelievable advantage! Another thing in your favour is the casino software. The software is made to generate numbers entirely at random, so unlike the real casino, which I spent most of my earlier years studying, online casinos are actually easier to beat. Think about it like this; when you are in a real life casino, a lot of people bet on the neighbours (this is when you bet on a certain set of numbers that are next to each other). So say you bet on 0 neighbours your bet will cover 3, 0 and 32. People bet neighbours because a real croupier tends to roll the ball at the same section of the board throughout their shift. However, online casinos don't have a real croupier rolling the ball - they have a computer program that randomly generates numbers. These numbers are supposed to be totally random, but, how random can a computer program be? Well, it can be too random (in order to try and look realistic) and that is where the flaw really lies, as the programmers of the random generators have made it so the program will rarely pick numbers from the same section of the board more than a few times in a row, because they fear this will not look random enough.

Now you need to understand what the column dozen bets are so I have illustrated them for you on the next page.

1) This is a bet on “Low”. You win if any number from 1-12 (Inclusive) comes in.

2) This is a bet on “Middle”. You win if any number from 13-24 (Inclusive) comes in.

- 3) This is a bet on “High”. You win if any number from 25-36 (Inclusive) comes in.

If you follow my instructions, you will gain between \$1 and \$3 for every winning number, regardless of how many losing ones you have had.

Now, print off the attached spread sheet document, and keep it next to you, with a pen. The document should look something like this:

0	5	10	15	20
25	30	35	40	45
50	55	60	65	70
75	80	85	90	95

L	M	H	O

The idea with this is to keep a precise record of exactly how the table you are betting on is ‘Running’. There is no point to betting at random, so please, be accurate with this. What you need to do is every time you spin the

wheel, record whether a 'Low,' (M) 'Middle' (M) or 'High' (H) number drops in.

For example, if you are on a table and spin the wheel ten times, and the following numbers drop in: 04, 11, 36, 14, 20, 25, 02, 33, 13, 16, your table would look like this:

0						5						10						15						20						
L	L	H	M	M		H	L	H	M	M																				
25						30						35						40						45						
50						55						60						65						70						
75						80						85						90						95						

L	M	H	

When you begin to play roulette, DO NOT place ANY bets at all. Patience is the key now. Keep spinning the wheel and recording what numbers drop in on your table. What you are waiting for is a consecutive run where 1 of the sections of number has not come in for 5 spins.

What I mean is this – say the following numbers now drop into the above table: 32, 17. The table now looks like this:

0						5						10						15						20						
L	M	H	M	M		H	L	H	M	M		H	M																	
25						30						35						40						45						
50						55						60						65						70						
75						80						85						90						95						

L	M	H	

A 'Low' number (L) hasn't dropped in for five consecutive spins. It's time to start betting! (making money)

Bet Number	Stake	Gain
1	\$1	+\$2
2	\$2	+\$3
3	\$3	+\$3
4	\$4	+\$2
5	\$6	+\$2
6	\$9	+\$2
7	\$13	+\$1
8	\$20	+\$2
9	\$30	+\$2
10	\$45	+\$2
11	\$67	+\$1

Place bet number 1 on the 'Low' section of the board (if unsure, check diagram above). Spin the wheel. If a low number drops in, Congratulations! You are now in profit! If not, do not worry. Place bet number 2 on 'Low'. Again, if you win, well done, you are in profit! If not, don't worry, place bet number 3 on 'Low'. Keep placing the bets until you win. By doing this, and sticking to the staking plan shown on the left, and you will never lose when your number drops in. You must be precise though!

I know that the gains do not appear to be a lot per bet, but as it is possible to lay up to 70 bets in an hour, your money will soon add up. Think about it. I bet \$70 (£36) an hour is a better wage than you are earning at the minute, and all it takes is a bit of time and discipline!

I realize that you may be confused by this, but don't worry, read through it again a few times and it will become clear.

That really is how simple this system is!

If you haven't already downloaded the free casino software then you can do so now by – [Clicking Here!](#)

But that is not all!

If you still don't believe how fantastic this system truly is, then find out for yourself – for free! Read on to find out how...

Firstly, if you haven't already done so, [click here](#) to download the software to play on-line roulette. Then, create a demo play account – you will find that you have \$2000 practice money to put our system to the test!

Once you are satisfied that it works and you truly realize how much money it is possible to make, then it is time to play for real! Click on the 'Real Money' play link in the Casino software, and deposit – but guess what? I can guarantee that the Casino will add at least 200% to your first deposit up to \$200! So if you deposit \$100 to your new Casino account, you will receive \$300! There you go - \$200 up already and you haven't even started playing, or put any of your own money at risk!

You can then use this \$200 free money to play my system and win \$\$\$!!!

100% MONEY BACK GUARANTEE!

I'm so confident that you will make money using my system that I offer a 100% money back guarantee! No questions asked! What more can I offer?

NO RISKS JUST PURE PROFITS!

I MIGHT BE CRAZY,
BUT I'M RICH!
ARE YOU??

Download the Casino Software Now! – [Click Here!](#)

FINALLY! A last few pointers that will help you along the way...

- 1) Try not to spend more than 15-20 minutes at each table. I don't know why, but after this amount of time, every table seems to get harder to play.
- 2) Avoid playing between 2-3PM. Again, I don't know why but always at this time the Casinos' seem harder to play.
- 3) DO NOT GET GREEDY! That is the major downfall of most players. Set a target and stick to it. Once reached, walk away. A good target is around \$150 (£79) a day.
- 4) Only ever bet what you can afford to lose. There is no point going bankrupt in a Casino! (It is gambling)
- 5) Be disciplined and most important - Stick to your rules!

MAKE THE CASINO YOUR CASH COW NOW!
